

SUSHIL LOVANSHI

INFORMATION SECURITY ANALYST

OBJECTIVE

I am an ambitious professional aspiring to establish a rewarding career in Cyber Security within a dynamic and growing organization. Eager to leverage my skills and knowledge to contribute to the security landscape, I am seeking opportunities that provide both challenges and avenues for continuous learning and career advancement. Goals Looking for an entry-level position to gain experience and knowledge.

HOBBIES

Ethical hacking : I am interested in ethical hacking and also I like to solve hack the box machine. security technologies.

ACADEMIC PROFILE

- Pursuing to B.Com Computer final year.
- Intermediate from MP Board (2021)
- 10th from MP Board (2019)

WORK EXPERIENCE (INTERNSHIP)

[Cybrom Technology] [Cybersecurity]

[Dates From]–[To]

- Designing and implementing security measures to protect systems and networks.
- Conducting vulnerability assessments and penetration testing to identify and address potential weaknesses.
- Analyzing and responding to security incidents, ensuring timely resolution and mitigation.
- In-depth traffic analysis to identify patterns and anomalies in network behavior.

[Cybrom Technology] [System Administrator]

[Dates From]–[To]

- Configuring and managing servers, emphasizing proficiency in Linux (Red Hat Enterprise Linux), ensuring a secure and efficient IT infrastructure.
- Installing, configuring, and maintaining various software applications on Linux servers.
- Managing user accounts, permissions, and file systems to ensure proper access controls.
- Implementing security measures to safeguard systems from unauthorized access and potential threats.
- Collaborating with cross-functional teams to troubleshoot and resolve technical issues.
- Implementing security measures, including firewalls and intrusion detection systems, to safeguard systems from unauthorized access.

TECHNICAL EXPERTISE

Network Security:

- Proficient in using Wire Shark for comprehensive analysis of network traffic, with a focus on identifying and mitigating malicious activities.
- Analyzed malicious traffic patterns to detect and prevent potential cyber threats.

Web Application Security:

- In-depth understanding of OWASP Top 10 vulnerabilities, with practical experience in securing web applications against these threats.
- Hands-on expertise in identifying and mitigating SQL Injection vulnerabilities, ensuring robust database security.
- Implemented measures to prevent and mitigate Cross-Site Scripting (XSS) attacks, securing web applications from client-side vulnerabilities.

Penetration Testing:

- Conducted thorough Vulnerability Assessment and Penetration Testing (VAPT), identifying and remediating security weaknesses.
- Developed and executed strategies to address OWASP Top 10 issues, ensuring comprehensive security.

Network Forensics:

- Proficient in conducting network forensics to investigate and analyze security incidents, ensuring the identification and resolution of network-related threats.
- Conducted in-depth traffic analysis during an internship at Cybrom Technology, gaining insights into network behaviors and potential security risks.

Malware Analysis:

- Demonstrated proficiency in identifying and analyzing various malware families, understanding their behavior, and implementing effective countermeasures.

TECHNICAL SKILL

- **Red Hat:** Configuration and administration of Red Hat Enterprise Linux, ensuring system stability and security.
- **AWS:** Implementation and management of cloud solutions, emphasizing security best practices.
- **CCNA:** Design and implementation of efficient network solutions, ensuring connectivity and security.

CERTIFICATIONS

- **REDHAT**
- **AWS**
- **CCNA**

DECLARATION

I affirm that all the information provided is accurate to the best of my knowledge, and I assume responsibility for its correctness.
